## Principles of the Audio-lingual method

- *The purpose of language learning is to learn how to use the language to communicate (The teacher initiates a chain drill in which each student greets another).*
- *Positive reinforcement helps the students to develop correct habits (The teacher says, "Very good," when the students answer correctly).*
- *The major objective of language students should learn to respond to both verbal and nonverbal stimuli (The teacher uses spoken cues and picture cues).*
- *Each language has a finite number of patterns. Pattern practice helps students to form habits which enable the students to use the patterns.*
